

Data Centre Risk Radar Briefing - techUK

THURSDAY 26 APR 2018	BRIEFING Data Centre Risk Radar - Technical Skills Shortage TIME: 17:30 - 19:00 PLACE: 10 ST BRIDE STREET, LONDON
---	--

techUK's Risk Radar sessions are now in their fourth year. Each briefing explores a different business risk facing the sector, from energy security of supply to Brexit.

Occasionally we revisit risks that are changing, for instance as legislation develops. The briefing lasts 30-40 minutes followed by a healthy dose of Q&A that tends to continue on a less formal basis afterwards. Topics are usually confirmed about a month ahead to ensure they are relevant.

For more information please contact lucas.banach@techuk.org or emma.fryer@techuk.org.

Or visit our summary of our first two years of Risk Radars which you will find [here](#).
