

DCD Enterprise 2018 - New York

Rumors of the demise of the enterprise data center to be challenged at 16th DCD summit in New York.

As the IoT, Smart Cities, Big Data/Analytics, Cloud, drive the industry forward, and now blockchain, AI and a host of other technologies join the fray, DCD Enterprise is about NOT forgetting the on-prem engine and its future relevance. Join 1,500+ professionals whose day job is to keep the digital world up and running. From "mud to cloud", this event covers the full ecosystem for how enterprise data centers are being re-defined and how the economics of digital business, IT and data center service delivery is being re-shaped.

With 100+ hours of expert panels, keynote presentations, interactive workshops and roundtables, not to mention an expo showcasing 100 of the latest technologies - this really is the event not to be missed! In less than 48 hours you will network, learn and share your way to a more decisive 2018.
