

DCD>London 2018

Welcome to DCD>London, the European event for senior executives and technical teams responsible for the design, build, management and operation of data centers to deliver on the high-velocity business demands of the zettabyte era.

DCD>London is the industry's most renowned full-stack digital infrastructure conference dedicated to the European data center and cloud infrastructure community. The 2018 event explores the full on-premise and IT service ecosystem, from enterprise to hyperscale, and colocation to edge.

With 100+ hours of thought-leading presentations, panels, keynotes, lightning sessions, hosted roundtables, solutions briefings, 'big discussions,' and private, closed-door debates, DCD>London is the annual industry gathering not to be missed.
