

Anti Contamination Steering Group

Sir Alexander Fleming Building 5, Room G15
Imperial College Road
SW7 5NH London
United Kingdom

Tuesday, 25 September 2018
09:30 to 11:00

The
data centre
trade association

Agenda

1. Review of the anti contamination guideline document for 2018.

New additions and review of best practices in mission critical spaces.
Confirm timeline for draft submission and comments.

2. Energy saving through deep/technical cleaning.

Can we run studies and provide a new technical paper to the industry (which DC's can we target for this process) – plan to take this forward if feasible.

3. Innovation/Product & Testing in the Industry.

Surface testing demo to be undertaken by ABM Critical Solutions (ISO 14644-9) – information booklets will be available for the session and PowerPoint slides.

What other Innovations are available in the industry?

4. Publications through the DCA.

What publications/case studies can we push through the DCA to raise awareness on controlling contamination in mission critical spaces (DCA web site promotion).

5. Any changes in the Industry?

Any items to raise awareness throughout the group.
